Welcome to an exciting seminar focused on the presence of 2<sup>nd</sup> generation Christians in Dk. A second generation of Christians in Denmark face specific challenges, which also holds true for leaders of these young Christians.

We have gathered exciting presentations in this seminar but also opened several time-slots to listen to each other, in order to share concerns, and to inform future seminars. If it has the interest it is possible for the inviting organizations to create more seminars, or perhaps even a course on Christian leadership and theology.

The invitation for this seminar goes to representative of second generation Christians in Denmark, and to leaders of congregations or churches hosting migrants. The expected outcome is enhanced knowledge of the challenges relating to second generation Christians, increased network across cultural boundaries and influence on future seminars.
